

NOALTO Reusable K Cup Instructions

Product Information

Eco-Friendly: Keurig reusable k cup is made of high-quality stainless steel and 100% BPA, lead, and DEHP free. Paper filters need to cut down 1 billion trees every year, and discarded plastic coffee capsules flow into the ocean, causing marine life to eat by mistake. When using our reusable k cup, you reduce the use of paper filters and plastic coffee capsules.

Keurig reusable coffee pods design science: Coffee reusable k cup adopts one piece design with a tightly sealed top cover that prevents overflow. The 360 degree perforation on the bottom and side walls allows water to fully soak the coffee powder which optimizes extraction and gives richer flavor.

Reusable k cups health and safety: Stainless steel k cup reusable design preserves the coffee natural oils and flavors. These reusable coffee pods keep coffee original and are dishwasher safe.

K cup reusable fully tested for compatibility: Works with K Classic, K Elite, K Latte, K Cafe, K Select, K Compact, Breville K Cup, Mr. Coffee K Cup, and Keurig 1.0 and 2.0 machines. Not compatible with K Supreme, Plus, Smart, and K Slim.

Original patented design: Very easy to use. Fill with coffee grounds, brew, dump the grounds, and wash the reusable k cup filter with water.

Specifications

Material	Stainless Steel
Brand	NOALTO
Shape	Basket
Number of Pieces	2
Unit Count	1.0 Count

How to Use

1. Open the lid and check that the mesh basket is clean and dry.
2. Add medium fine ground coffee and leave a little space at the top.

3. Close the lid firmly.
4. Place the cup into your machine like a regular pod.
5. Select your brew size and start the cycle.
6. Remove the cup after brewing and empty the grounds.
7. Rinse all parts under warm water and let everything dry.
8. For deeper cleaning, soak in warm water with mild dish soap.
